

Global variables and parameters

The diagram illustrates a table for global variables and parameters. A horizontal arrow points to the right above the table. The table has two rows and seven columns. The first row contains the variable names: 'a', 'b', 'c', 'd', 'arr1', 'arr2', and 'arr3'. The second row contains their initial values: '<snapshot>', '...', '...', '...', '...', '...', and '...'. To the right of the table, a vertical arrow points downwards, labeled 'Successful runs'.
